Green Frame

Features and Lineup

The Green Frame aluminum frame, "GF," was released in 2001. An original product produced and designed by SUS Corporation, it uses a single-touch joint system so that it can be assembled with a single wrench. GF offers numerous features that are perfect for on-site kaizen—continuous improvement.

Features **1**
Single-touch Joint

Fix the claws of the connector around the profile edges and tighten the bolt. Anyone can master GF assembly quickly and easily.

Features **2**
Parallel Lines and Right Angles

With frames and connectors designed to produce near-perfect parallel lines and right angles, minor or major adjustments are quick and easy, saving time and manpower.

The Four GF Series: Actual Size

GF-S

19 mm Type

**Slim Frame:
Build More with Less**

SUS's slimmest and most light-weight frame, perfect for tight areas and for supporting GF-N and GF-G.

GF-N

28 mm Type

**Standard GF, boasting an
overwhelming variety of
parts and accessories.**

Uniting strength with ease-of-use, the largest number of parts for unlimited applications.

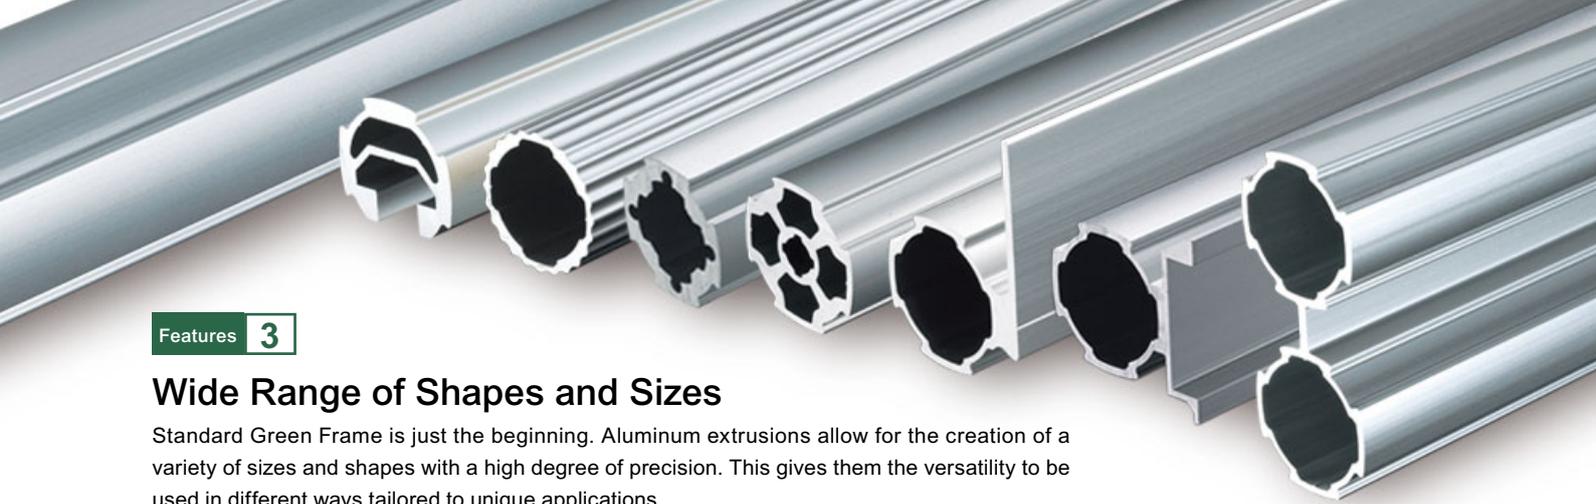

GF-G

43 mm Type

**A balanced frame combining
versatility with strength.**

This profile shape is compatible with GF-N series fittings and has a larger diameter for increased strength.

Features **3**

Wide Range of Shapes and Sizes

Standard Green Frame is just the beginning. Aluminum extrusions allow for the creation of a variety of sizes and shapes with a high degree of precision. This gives them the versatility to be used in different ways tailored to unique applications.

Features **4**

Extensive Parts

Basic connectors, cross-series accessories, motion parts for karakuri, and more let your ideas take shape.

Features **5**

Active Motion

Motion parts and electric modules combine to achieve basic movements, reducing the burden on the workforce.

GF-L

53 mm Type

High strength frame leading GF into a new frontier.

The largest frame size is ideal for high-load areas such as parts delivery racks and agricultural factories.

GF Did You Know?

“Green Frame”

GF stands for “Green Frame.” Rather than the color, “Green” refers to “environmentally-friendly products that minimize waste.” Aluminum’s non-wasteful design, high recyclability, and reusability make GF’s frames and connectors truly “green.”

World-famous GF

SUS Corporation makes deliveries to more than 20 countries including the USA, Canada, Mexico, France, Italy, Spain, and Russia, as well as Thailand, China, and the Philippines, reaching out from our corporate bases around the world.

Thanks to its high degree of design freedom and easy assembly/disassembly, GF is widely used in a variety of industries. Its lightweight nature means that the stress on trolleys is reduced, and its flexibility of design means that layouts can be adjusted with ease. Not only that, but GF has a high aesthetic appeal and is easy to modify for future improvements. This makes it an ideal material for kaizen—continuous improvement.

Automobile Parts Manufacturing Plant (Hamana Plastic Company, Ltd.) Sing Magazine No. 33 (July 2016)

Inside the factory, standardized work boards, chuters, and racks are lined up. The manufacturing flow is laid out in a straight line from setup to assembly and inspection, all the way to shipping. In a cell system, fluctuations in production quantity are directly related to expansions and retractions of the line itself.

Agricultural Factory Cultivation Room
(Shikoku Instrumentation Company, Ltd., Sanuki Yasai Koubou)

Sing Magazine No. 33 (July 2016)

Inside the factory are lines of large cultivation racks constructed from GF. The GF profile allows a variety of items necessary for production to attach to the frames such as reflectors and pipes.

Improvements by various companies using karakuri promote advancements in manpower, productivity, and efficiency. GF is at the center. Green Frame's expanded lineup of electrical parts and modules further expand improvement options using basic electric parts. GF brings kaizen to the production site.

The diverse parts and frames of the GF Series create endless possibilities. Their applications can be seen in settings far from factories, such as living spaces. Combining standard parts, GF's high degree of design freedom and versatility matches a wide range of materials and situations. GF sparks the joy of seeing your ideas come to life.

Private Residence (O Plan)

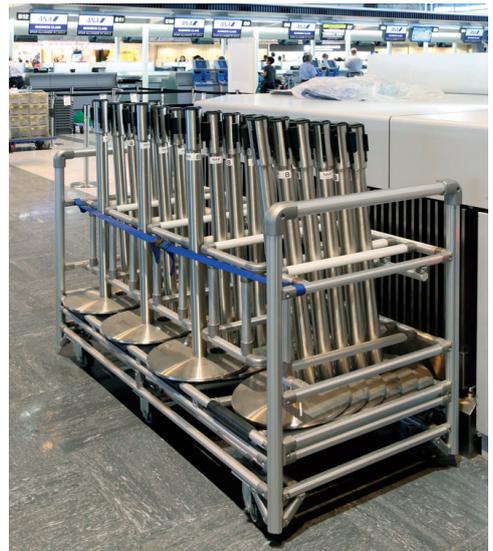

Furniture such as a clothes rack, bed, and bench are designed to fit the room. The frames are cut according to the height of the ceiling and the rack is affixed without damaging the wall and floor.

Only with Aluminum

Material and Shape

SUS Corporation's aluminum frames have excellent corrosion resistance and durability made possible by the extruded materials and anodized surface treatment.

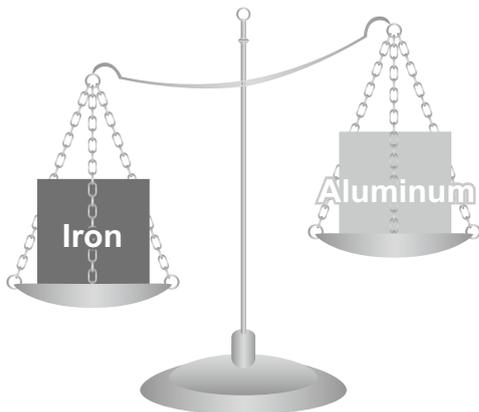

Scalability and connections that require no special training give GF frames a clear advantage over other materials like welded steel. Not only that, but the shape of the cross-section and the joint system can meet the challenges of almost any situation. Applications using GF are being invented and reinvented over and over again all over the world.

Lightweight

1/3 the Mass of Iron

Taking aluminum's relative density into account, SUS developed a lightweight, yet rigid frame with a carefully designed cross-sectional shape. This innovation reduces the overall weight of equipment and enables improvements. By using these frames for moveable racks, chutes, and trolleys, the burden on workers can be greatly reduced and line changes can be carried out with ease even after installation.

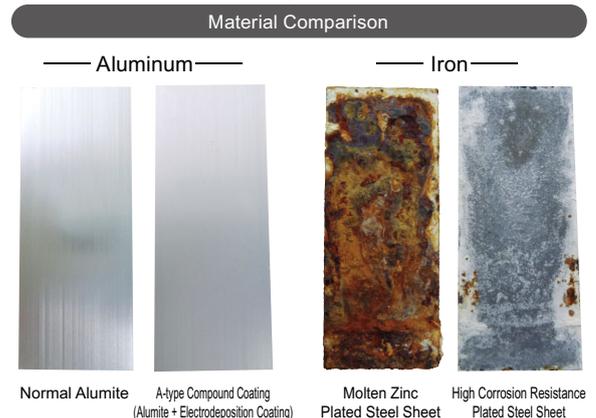

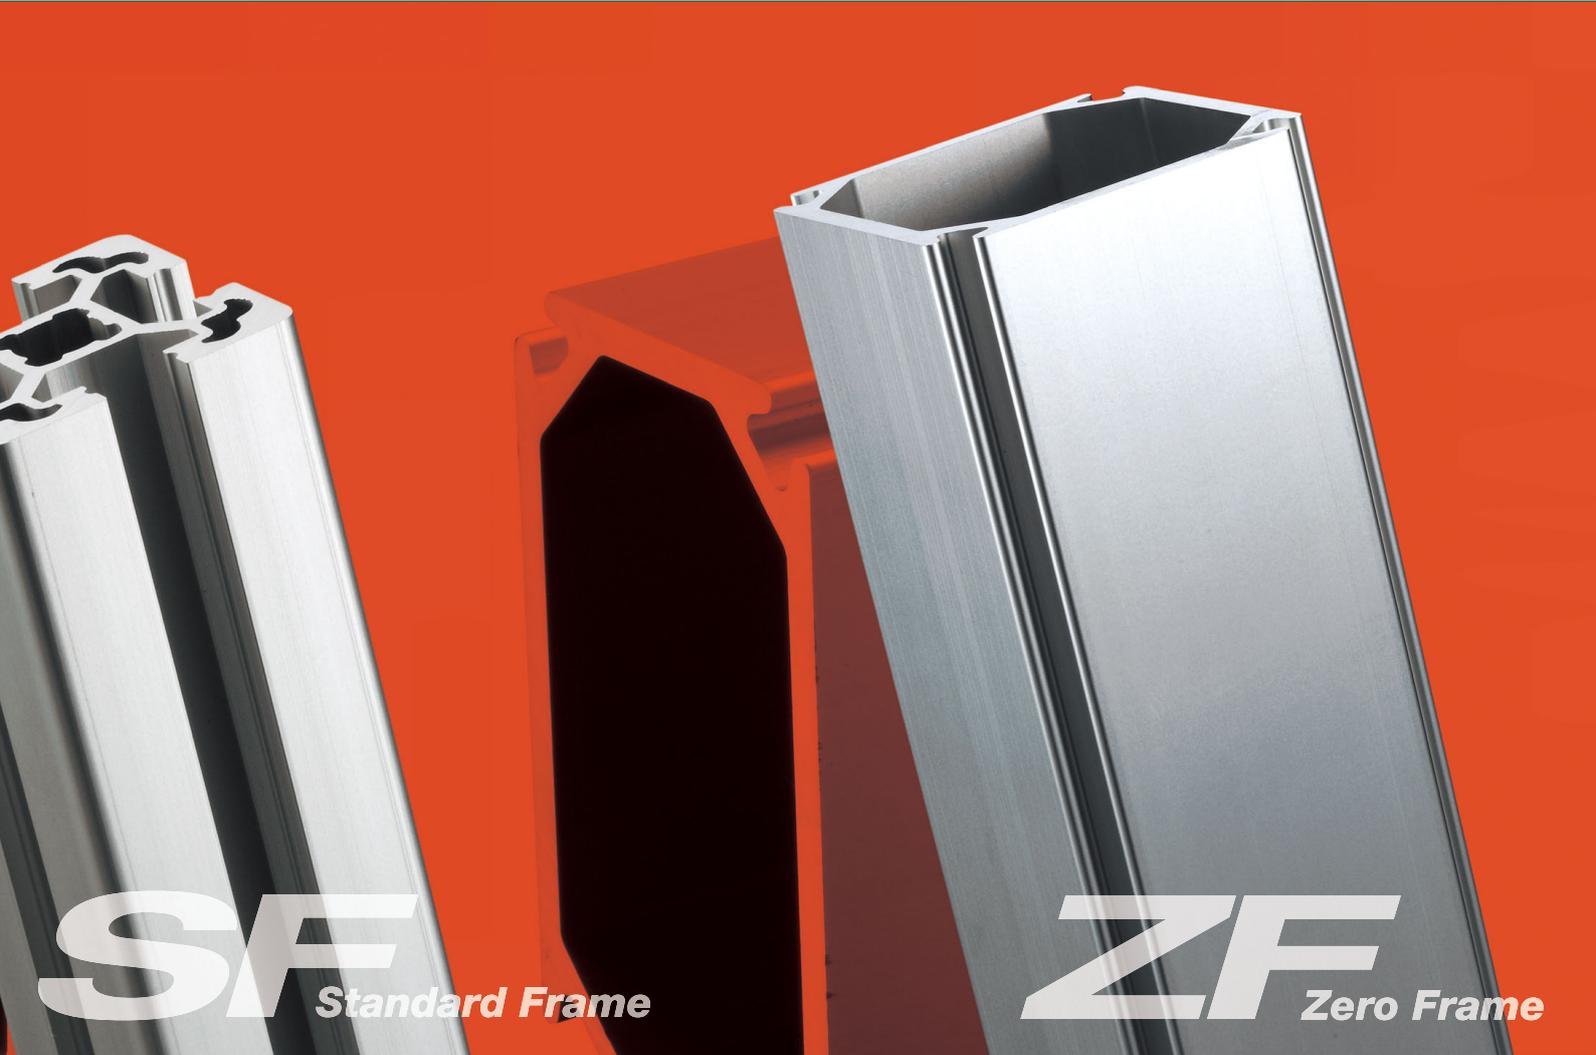

Strong vs. Corrosion

High Corrosion Resistance

The anodized layer of nine μm or more on the frames provides excellent resistance to corrosion and weather. The aluminum on the surface of the frame reacts with oxygen to form an oxide layer which does not peel off like paint and actually suppresses the buildup of foreign particles. Because the surface does not easily scratch or stain, the aluminum frames contribute to a more hygienic operating environment while maintaining a sleek aesthetic.

Corrosion Test Comparing Aluminum and Iron (Salt Water Spray Test: 1000 Hours)

Environmentally Friendly

Environmental Protection and Responsibility

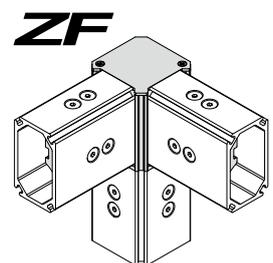

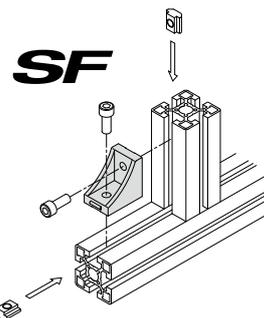

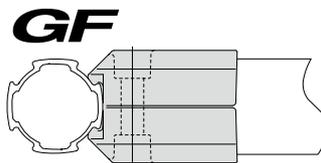

Aluminum enjoys a particularly high degree of recyclability compared to other metals. Recently, it has gained attention as a resource that can reduce environmental impact. The electricity needed to refine recycled metals is only 3% of that needed to refine new ones. To take advantage of this excellent resource, SUS uses aluminum in more than just frames; we also use it in numerous parts such as brackets and connectors.

Secure Bolts

Easy to Assemble and Disassemble and Highly Reusable

Because bolts are used to fasten frames together, structures can be disassembled and reassembled as needed. GF structures can also be expanded to match the available work space or altered to suit new purposes. Relocating a unit becomes a simple task by breaking it down into a few smaller parts. Green Frame promotes the reuse of materials, minimizing waste.

Quick Delivery of High Quality Aluminum Products Anywhere in the World

SUS is uncovering the new needs of developing markets.

In order to overcome cost competition, many companies are actively expanding overseas, establishing sales channels and manufacturing bases. International trade has become commonplace, and the same level of quality and speed that SUS brings to Japan is being sought all over the world. In addition to our group of international bases, SUS Corporation has established sales agents around the globe to build a strong network not only in Japan, but throughout South-east Asia, Europe, and South America.

Service and Support

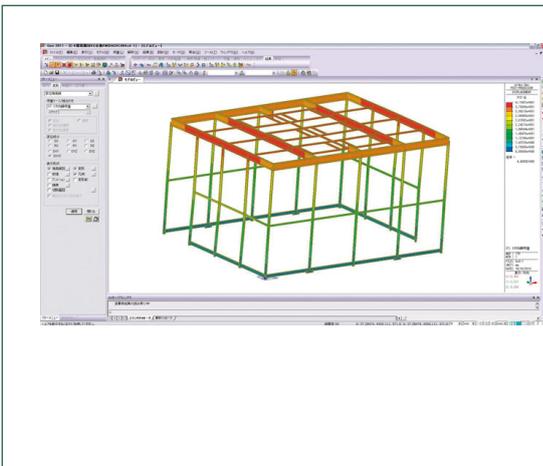

Design Support Service

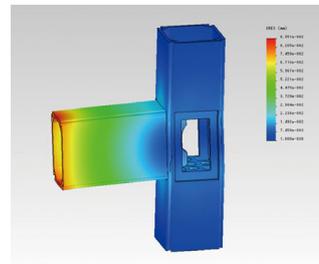

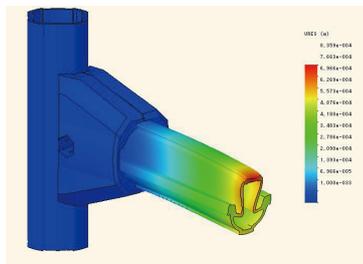

SUS Corporation provides design support services to assist our customers. Just provide SUS with a simple sketch showing your structure's desired dimensions and we will create a CAD drawing, select the necessary parts, and submit a quotation— all at the same time. In addition to this service, SUS also offers a free 3D drawing software, Unit Design (below). This simple program lets anyone design their own structure in Green Frame or Standard Frame. For details, please contact the SUS sales office near you.

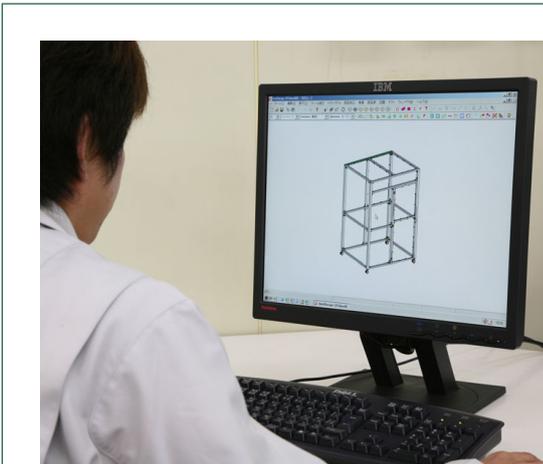

Structural Analysis Service

SUS will respond individually to requests for structural analysis of units such as stands and booths using aluminum frames. Please feel free to contact us. We will propose the most suitable solution for you using our years of experience as expert manufacturers of aluminum frames.

3D Drawing Software: Unit Design

This is SUS's original software for creating 3D assembly drawings of structures using SF and GF Series aluminum frames. You can download the software for free from our website. A library containing SF and GF information from the catalog is included in the software. Unit Design automatically generates parts lists and drawings from the 3D model. By making Unit Design more user-friendly than ever, anyone interested in the GF or SF Series can create their own structures, from designers to hobbyists.

Assembly and Delivery Service

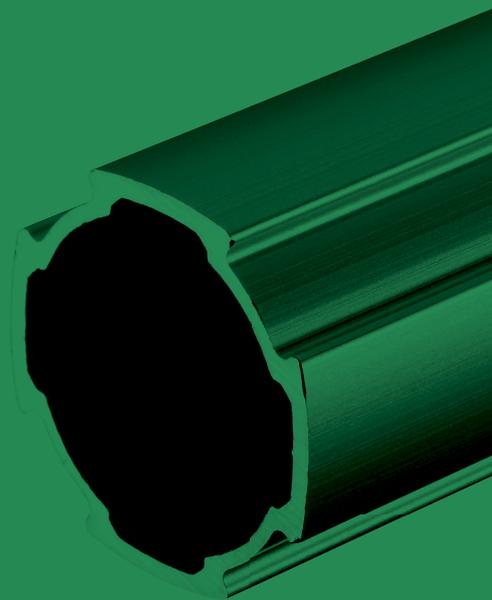

SUS Corporation was one of the first companies in the industry to launch an assembly and shipping service. Our professional technical staff stationed at our manufacturing bases will respond promptly and precisely to your request. Please indicate "Assembly Required" in your request for quotation and order. SUS will reply to you with CAD drawings and assembly estimates. We encourage you to make full use of our experience and skill as expert manufacturers.

Overseas Procurement Information

SUS Corporation has prepared a support system that quickly and thoroughly responds to your requests, even in factory automation environments different from those found in Japan. Numerous sales centers are located throughout Asia, including SUS's own extrusion plant and accessory parts factories in northern Thailand. Outside of southeast Asia, we also respond to requests in North America and Europe with prompt service. SUS continues to expand our business to meet rapidly increasing procurement needs worldwide.

Multi Connector Inner

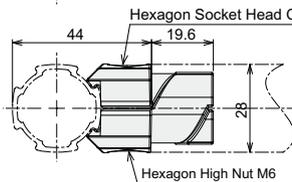

- This connector has the same outside dimensions as the frame.
- Suitable for paths or chutes using corocon rollers, or for creating a sleek appearance.

Material/Technical Data
Material : Aluminum Diecast
 Bolt/Nut part : Steel
Weight : 54 g
Environment : RoHS10 Compliant

- Can also grip GF-G (43mm) frames

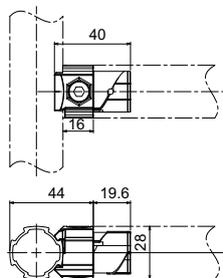

Name	Multi Connector Inner
Item No.	GFJ-200

Multi Connector Inner 2

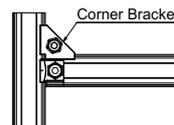

- This connector's shape is the same as the edges of the frame. A connector can be mounted to the side of this connector.
- Can also grip GF-G (43mm) frames.

Multi Connector Outer

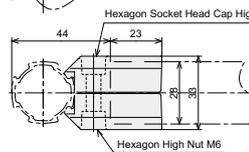

- 90° coupling.
- Fastening the joint requires only one bolt and wrench.

Material/Technical Data
Material : Aluminum Diecast
 Bolt / Nut part: Steel
Weight : 61 g
Environment : RoHS10 Compliant

- Can also grip GF-G (43mm) frames

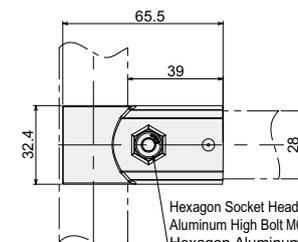

Name	Multi Connector Outer
Item No.	GFJ-000

Multi Connector Outer Hard

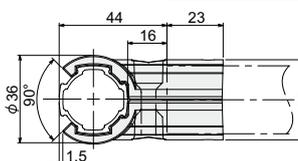

- Can be used in places that experience repeated moment loads. Attach a drill screw into the recessed portion to prevent the frame from coming off. A diameter of $\phi 3.5$ is recommended for pilot holes.

Material/Technical Data
Material : Body: Aluminum Diecast
 Bolt/Nut: Aluminum
Weight : 71 g
Environment : RoHS10 Compliant

- Recessed Portion: Recommended screw SFB-X96 pan head drill screw 4 x 10

- Can also grip GF-G (43mm) frames

Name	Multi Connector R Inner
Item No.	GFJ-207

Multi Connector R Outer

- The frame can be rotated and secured at any angle. Use it with a frame that cannot use an inner type.
- Attach the drill screw to the recessed portion to prevent the frame from coming off.
- A diameter of $\phi 3.5$ is recommended for pilot holes. Use this when you want to increase the resistance to being pulled out.

Foot Connector M12/Foot Connector M12 Conductive

- Use M12 adjuster or shaft screw caster to install.

Name	Foot Connector M12	Foot Connector M12 Conductive
Item No.	GFN-E02	GFN-E17

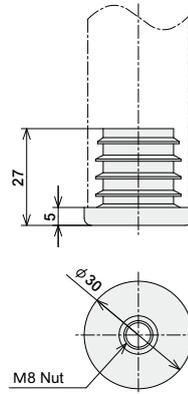

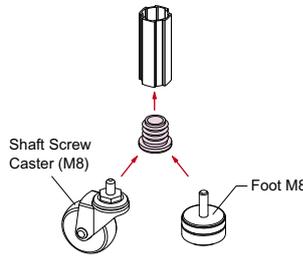

■Material/Technical Data
Resin type
 Material : Polyamide 6
 Weight : 24 g
 Environment : RoHS10 Compliant
Aim to Resistance value
 : $10^9 \sim 10^{11} \Omega$
 (Antistatic level)
Load Capacity : 1250 N
Conductive Resin type
 Material : Conductive Polypropylene
 Weight : 21 g
 Environment : RoHS10 Compliant
Aim to Resistance value
 : $10^4 \sim 5 \Omega$
 (Conductivity level)
Load Capacity : 500 N

- When using carts or trolleys that are frequently moved, or in cases where the foot connector will undergo strong impacts when moved, we recommend attaching fixed and free casters using Green Frame L Slot (P54).

Foot Connector M8

- Use M8 adjuster or shaft screw caster to install.

Name	Foot Connector M8
Item No.	GFN-E01

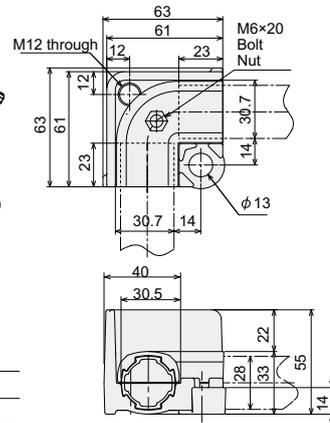

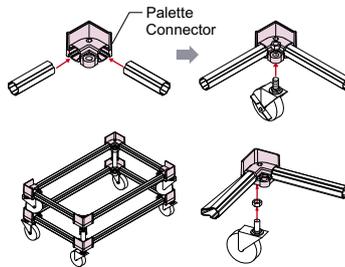

■Material/Technical Data
Material : ABS Resin
 Weight : 12 g
 Environment : RoHS10 Compliant
Load Capacity : 1200 N

- When using carts or trolleys that are frequently moved, or in cases where the foot connector will undergo strong impacts when moved, we recommend attaching fixed and free casters using Green Frame L Slot (P54).

Palette Connector

- Apply at the corner of Palette Trolley.
- Use this trolley for storage by stacking items.

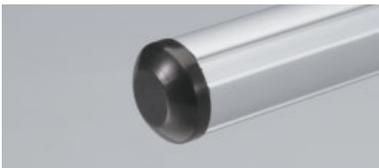

Name	Palette Connector
Item No.	GFJ-A13

■Material/Technical Data
Material : Aluminum Diecast
 Weight : 193 g
 Environment : RoHS10 Compliant
Load Capacity : 3250 N

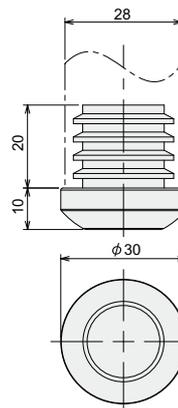

■Product included
 Hexagon Nut M12 (Trivalent Chrome Plating)×1

- Compatible caster: M12 Type of Shaft screw caster

Rubber Fit Inner

- Rubber foot inserted into GF frames, etc.
- Can also be used as a simple anti-slip device.

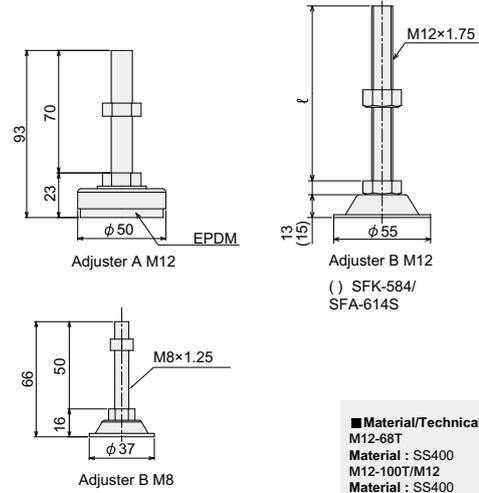

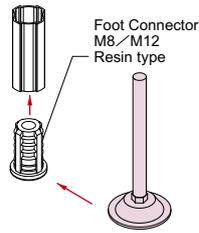

Name	Rubber Fit Inner
Item No.	GFN-013

Foot M8

■ **Material/Technical Data**
Material :
 Thread : Steel
 Base : Polyamide
Weight : 35 g
Environment : RoHS10 Compliant
Load Capacity : 800 N

Name	Foot M8
Item No.	SFA-602

Adjuster M8 with Non-slip Sheet

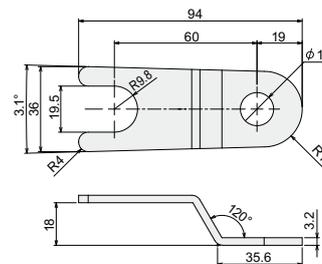

■ **Material/Technical Data**
Material : Screw: Stainless steel
 End Plate: POM
 Non-slip Sheet: PU (transparent)
Weight : 26 g
Environment : RoHS10 Compliant
Load Capacity : 490N

- Adjuster fitted with a non-slip sheet.
- The installation portion and the knob can rotate independently in their installed positions, so they can be adjusted as-is.
- Wipe the non-slip sheet with a damp cloth to restore its adhesive force.

Name	Adjuster M8 with Non-slip Sheet
Item No.	GFN-009

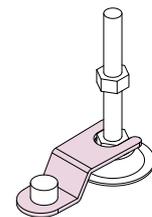

Clamp for Adjuster

■ **Material/Technical Data**
Material : SPCC
Weight : 70 g
Environment : RoHS10 Compliant

- Special clamp for adjuster M12 only. Prevents movement due to vibration or impact.

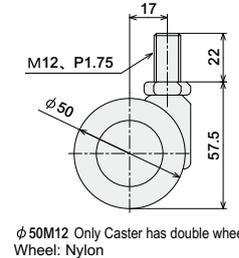

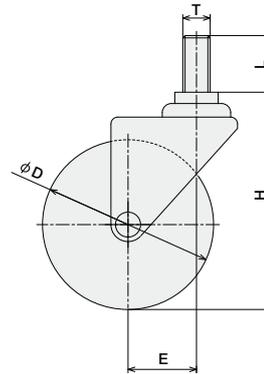

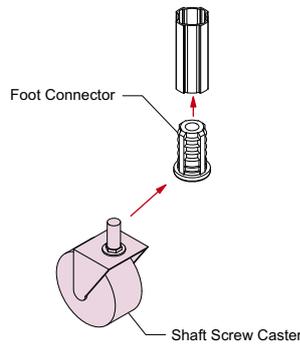

Name	Clamp for Adjuster
Item No.	GFA-B89

 ● Can also grip GF-G (43mm) frames.

Name	Single Rotary Connector (2 per set)		
Item No.	GFW-557		

One Way Clutch

- Rotates one-way only (switching the release plate off allows rotation both ways). Eight grips allow for attaching connectors to its surface.

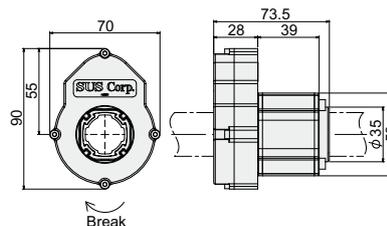

■ **Material/Technical Data**
Material : Body : Extruded Aluminum
 Cap : Aluminium Diecast
 Bearing : Stainless
 Spacer Nut:Stainless
 Bolt : Steel
Weight : 288 g
Environment : RoHS10 Compliant

Name	One Way Clutch		
Item No.	GFJ-C19		

Rotary Connector with Rotary Damper

- This item combines a braking system that uses hydraulic dampers and a rotary connector (GFJ-A94) that achieves a smooth rotation with bearings. A break can be applied to the rotational axis.

■ **Material/Technical Data**
Material : Rotary damper: Resin, Aluminum
 Rotary Connector: Aluminum, Iron

Rotary Damper

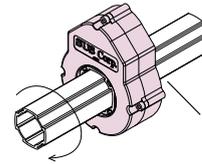

- This is a braking system that uses hydraulic dampers. A break can be applied to the rotational axis. Used in combination with the rotary connector (GFJ-A94) or one way clutch (GFJ-C19).
- Calculate the working torque and select a damper.

Material/Technical Data
Material : Extruded Aluminum
 Cover, Gear: Resin
 Bolt: Iron
 Damper: Resin, Stainless Steel
Weight : 124 g
Environment : RoHS10 Compliant

Selection Criteria
Rated Torque : Soft 0.3 - 0.6 N · m
 Medium 0.5 - 1.0 N · m
 Hard 0.7 - 1.4 N · m

- Individually remove the rotary connector or one way clutch bolt, as well as the rotary damper cap, and fasten them together.

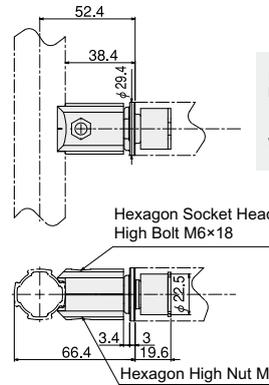

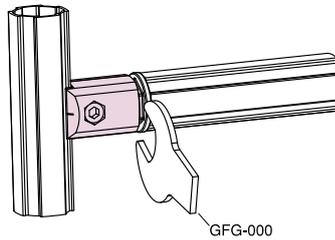

When viewed as shown at left, turning the frame clockwise will engage the break; turning the frame counterclockwise will allow it to move smoothly.

Weight : 99 g

Name	Pin Connector
Item No.	GFJ-B58

Folding Connector

- Can be folded and used for folding tables or chairs, as well as in karakuri functions.

Material/Technical Data
Material : Body : Aluminium Diecast
 Pin : Steel
 Fixed Area : Rubber, Steel
Weight : 87 g
Environment : RoHS6 Compliant

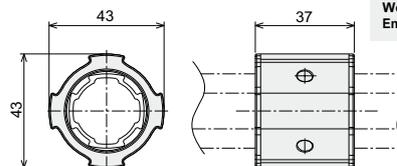

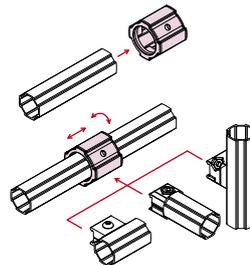

- Apply grease to the hinges before using to perform repeated operations.

Name	Folding Connector
Item No.	GFJ-247

Hinge Connector

- This connector is good for rotation or slide movements.

Quick Clamper

- Holds objects at any height.
- Locked by its own weight and can be released by detaching cap.

■ **Material/Technical Data**
Material : Body : Extruded Aluminium
 Spring : Stainless
 Resin Roller : PPS
 Plate : Aluminium
 Bolt : Stainless
Weight : 80 g
Environment : RoHS6 Compliant

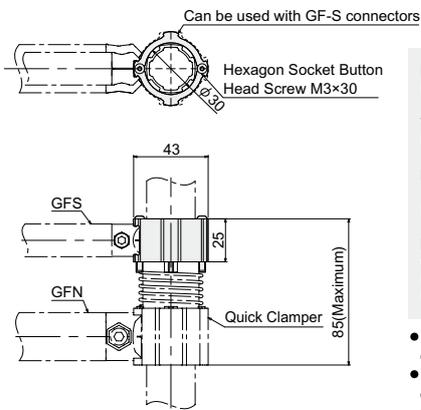

- Keep shock load or moment load from being placed on the Quick Clamper
- Install the Quick Clamper so that the angle deviation from the Green Frame is within $\pm 1^\circ$.
- Load Capacity : 100N

Name	Quick Clamper
Item No.	GFJ-C20

Quick Lever Cap Mounting Kit

- This can be used in place of the cap included on the Quick Clamper (GFJ-C20). By connecting two Quick Clamper caps on a frame, you can form a mechanism that can move up and down, but which only releases the lock when the frames are gripped together.

How to adjust the weight

- ① Remove the snap pin, then remove the tire.
- ② Remove the snap pin for the flywheel, then add or remove the flywheel to adjust the weight.

Alternative Installation Method

When using corocon other than aluminum corocon 2920P30 or 3520P50, use the center protrusion marked with an "★" to make adjustments.

●For details on maximum elongation, use the chart below. If you surpass the maximum elongation amount, it could result in deformation or damage of the spring. ●If used in an environment that has a temperature of more than 40°C, the load value may decay. (1N≒0.102kgf)
●Initial Tension : load of tension spring at the first stretch ●Spring Constant : $\frac{\text{Load (N)}}{\text{Elongation amount (mm)}}$

Guideline to choose tension spring

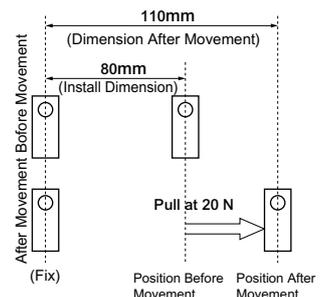

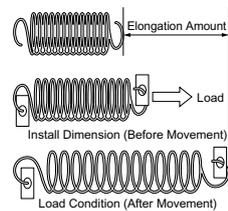

Selection of Condition

- 1.Slightly shorter than installed dimension
- 2.In a load condition that is within the maximum of elongation
- 3.Assumption load is under maximum load
- 4.Calculated load by below formula is smaller than assumption load

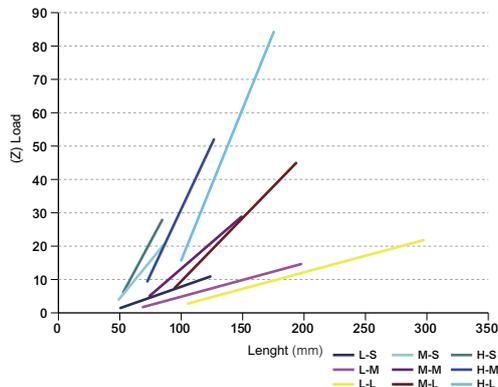

$$\text{Load (N)} = \text{Initial Tension (N)} + (\text{Elongation amount} \times \text{Spring Constant})$$

Selection Example

Install Dimension (Before Movement) Length 80 mm
Pull at 20 N
↓
Slightly Shorter
Middle M (75 mm) · Hard M (73 mm)
↓
Dimension of Load Condition (After movement) 110 mm
↓
Elongation Estimate
Maximum Elongation Amount
Middle M : 110 mm - 75 mm = 35 mm < 75.3 **OK**
Hard M : 110 mm - 73 mm = 37 mm < 54 **OK**
↓
Load Estimate
Initial Tension Elongation Amount Spring Constant
Middle M : 4.93 + (35 × 0.319) = 16.095N < 20N **OK**
Hard M : 9.6 + (37 × 0.782) = 38.534N > 20N **NG**
↓
Therefore, **Middle M Type** is best suited.

Nine Operating Patterns

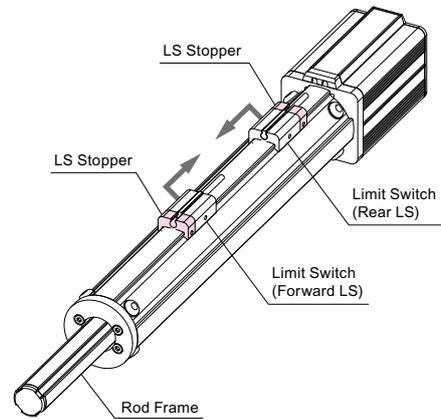

You can use any of the nine pre-programmed operating patterns below by selecting it on the setting switch inside the controller.

Turn the setting switch in the controller with a small flathead screwdriver. The pattern changes when the power is turned on again.

SW1	Operating Details
0	Advance when switch 1 is ON Retract when switch 2 is ON
1	When switch 1 is ON, move until forward LS is turned ON When switch 2 is ON, move until rear LS is turned ON
2	Advance when switch 1 is ON and return to the rear LS when OFF
3	Retract when switch 1 is ON and return to the forward LS when OFF
4	When switch 1 is ON, advance until the forward LS is ON, then retract to the rear LS
5	When switch 1 is ON, retract until the rear LS is ON, then advance to the forward LS
6	Advance when switch 1 is ON and return to the rear LS when turned OFF When returning, advance again if switch 1 is turned ON
7	Retract when switch 1 is ON and return to the forward LS when turned OFF When returning, retract again if switch 1 is turned ON
8	When switch 1 is ON, advance in increments When switch 2 is ON, retract in increments * Initial incremental value is 100mm. Options can be changed using the PC software.

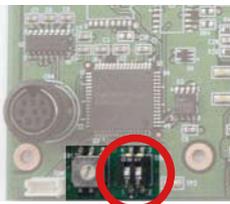

How to Adjust the Position of the Limit Switch

You can easily set the location of the limit switch by loosening the screw with a hex wrench just enough to allow it to slide.

* Because the LS stoppers are affixed at the stroke limit, do not force them.

Changing Between Four Speeds

You can select one of four operating speeds with the setting switch in the controller. By using the PC software, you can also separately set the advancing and retracting speeds, such as "fast advance" and "slow retract." The speed selector is set to "1" as the default. Advancing and retracting speeds are set to the same speed.

Speed Selection	1	2	3	4
DSW1 Setting	ON OFF OFF OFF	ON OFF ON OFF	ON OFF OFF ON	ON ON ON ON
Speed (L Type)	50mm/sec	40mm/sec	30mm/sec	20mm/sec
Speed (H Type)	200mm/sec	160mm/sec	120mm/sec	80mm/sec

Set the switch with a small flathead screwdriver.
Caution: the speed will change from the next movement onwards once the setting has been selected.

*Black indicates the switch position.

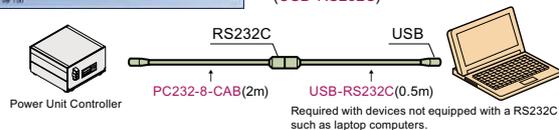

The four speed settings can also be changed using the PC software. The program can be downloaded for free from the SUS website.

[Functions]

- Change speed settings
- Change acceleration/deceleration time
- Change waiting time in operating patterns 4 and 5
- Save setting values to PC
- Print setting values
- Change parameters for eight operating patterns

Power Unit

Important Notes

- The Power Unit is not a high precision positioning device. It can perform actions such as “push” and “pull.” Since positioning is performed using limit switches, it is not suitable for repeated positioning.
- The Power Unit is designed to operate at a frequency of one cycle per minute, so it is not suitable for higher frequency uses.

The Power Unit will reach the end of its life when the deviation at the tip is more than 1.5 degrees when the rod is extended (estimated total distance travelled: 150km).

Reference: A total travel distance of 150km is equivalent to 250,000 cycles at a stroke of 300mm.

The distance travelled will total 150km in about two years at a continuous rate of one cycle per minute.

- Make sure no external force interferes with the rod except in the direction of the rod's advance and retraction.

Example: When Used Horizontally

Ensure that a moment load is not applied on the rod.

Use the Power Unit with a horizontal table or an externally affixed guide to ensure that no extraneous forces interfere with its movements.

- The controller has a high frequency chopping circuit for driving the motor. As a result, it may generate external noise. This can affect equipment that handles low level signals such as measuring instruments or radio receivers, and may cause problems if used in the same device.
- Because the Power Unit does not have a safety mechanism in the event of a power outage, if an unexpected loss of power occurs, the rod may suddenly move to the stroke limit. Similarly, if the Power Unit is actively transporting an object, it may suddenly move to the stroke limit if the power supply is cut off.
- The Power Unit may not operate normally if the rod is moved to a position beyond the sensor by an external force.

Operating Patterns

You can use any of the nine pre-programmed operating patterns below by selecting it on the setting switch inside the controller.

SW1	Operating Details
0	Advance when switch 1 is ON Retract when switch 2 is ON
1	When switch 1 is ON, move until forward LS is turned ON When switch 2 is ON, move until rear LS is turned ON
2	Advance when switch 1 is ON and return to the rear LS when OFF
3	Retract when switch 1 is ON and return to the forward LS when OFF
4	When switch 1 is ON, advance until the forward LS is ON, then retract to the rear LS
5	When switch 1 is ON, retract until the rear LS is ON, then advance to the forward LS
6	Advance when switch 1 is ON and return to the rear LS when turned OFF When returning, advance again if switch 1 is turned ON
7	Retract when switch 1 is ON and return to the forward LS when turned OFF When returning, retract again if switch 1 is turned ON
8	When switch 1 is ON, advance in increments When switch 2 is ON, retract in increments * Initial incremental value is 100mm. Options can be changed using the PC software.

How to Adjust the Position of the Limit Switch

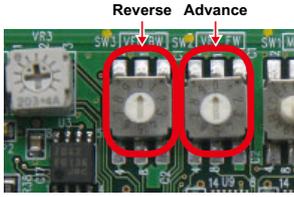

You can easily set the location of the limit switch by loosening the screw with a flathead screwdriver just enough to allow it to slide.

About the Brake

The brake is a mechanism designed to hold the slider in place in the event of power loss or emergency stop.
The controller automatically controls the locking/release of the brake.

Power Unit Slider Type 50L with Brake

Changing the Operating Speed

You can select one of ten operating speeds by using the setting switch in the controller. The advance and reverse speeds can be set separately, such as "fast advance" and "slow reverse."

Select	0	9	8	7	6	5	4	3	2	1
Speed(mm/sec)	100	90	80	70	60	50	40	30	20	10

Set the switch with a small flathead screwdriver.

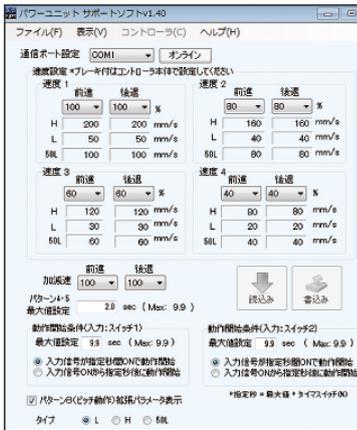

Caution: the speed will change from the next movement onwards once the setting has been selected.

* Speed setting in the PC software is not valid.

Changing the Internal Settings

PC Software

The program can be downloaded for free from the SUS website.

- Change acceleration/deceleration time
- Change waiting time in operating patterns 4 and 5
- Save setting values to PC
- Print setting values
- Change parameters for eight operating patterns

* A special cable is required to connect the Power Unit controller with a PC.

(PC232-8-CAB)

A USB-RS232C conversion adapter is required for a PC which has no RS232C port.

Item No.
XAK-S046

Foot Switch (one switch)

Foot switch for advancing movement. (Can be used for operating patterns 2 through 7.)

Item No.
XAK-S047

Important Notes

- The Power Unit is not a high precision positioning device. It can perform actions such as "push" and "pull." Since positioning is performed using limit switches, it is not suitable for repeated positioning.
- The controller has a high frequency chopping circuit for driving the motor. As a result, it may generate external noise. This can affect equipment that handles low level signals such as measuring instruments or radio receivers, and may cause problems if used in the same device.
- The Power Unit may not operate normally if the rod is moved to a position beyond the sensor by an external force.
- This brake is used to hold the slider in place when the power supply is cut off. It cannot be used for actual braking.

Load Capacity Vertical Max

Lineup Four Types

SiO Controllable

The Electric Winch is a power-driven unit that assists with up/down movement by winding and unwinding a nylon wire. The winch can easily raise or lower with a switch, completely eliminating the need for difficult operation.

1 Select from Two Types of Speeds and Loads
With a moveable distance of 1,000mm, the Electric Winch can be used for a variety of applications.
L Type Maximum Speed: 40mm/sec, Load Capacity: 15kg
H Type Maximum Speed: 200mm/sec, Load Capacity: 3kg

3 Easy to Control
The dedicated controller uses the same system as the Power Unit. The winch operates with only two signals: wind and unwind. Movement pattern and speed can be easily adjusted.

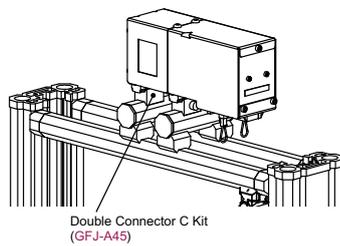

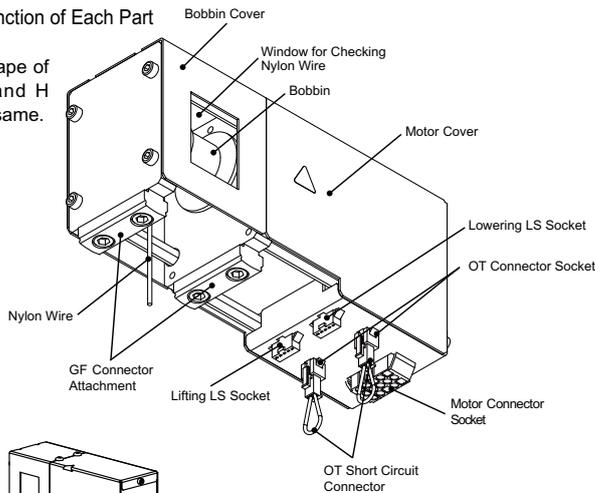

2 Easy to Connect to GF Frames
The bottom of the Electric Winch is fitted with GF compatible connectors, making it easy to mount.

4 Wide Range of Options
Indicators for raising and lowering limits such as photoelectric sensors and limit switches can be attached with GF connectors. There's no need to deal with troublesome wiring; simply plug in the connectors.
A variety of additional options is also available.

Electric Winch Main Body

Name / Function of Each Part

The outer shape of the L type and H type are the same.

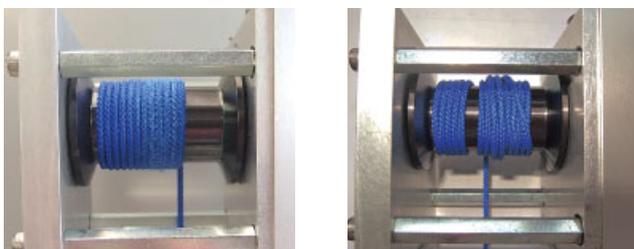

Installation Method

GF profile attachments are affixed to the bottom of the main body, allowing for installation with standard GF connectors. GF Connector Size: GF-N series attachments are fixed in two places.

About the Nylon Wire

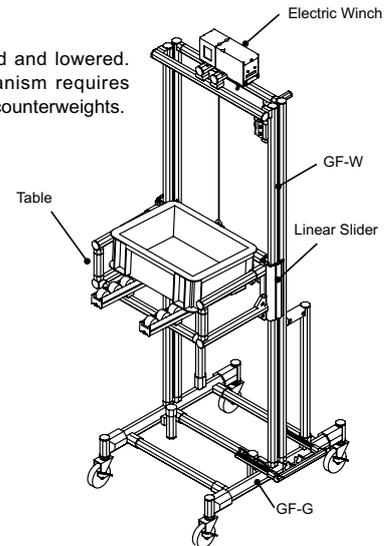

Nylon wire wears out over time. Be sure that it winds evenly. Risk of snapping increases when overlapping occurs.

Example of Use

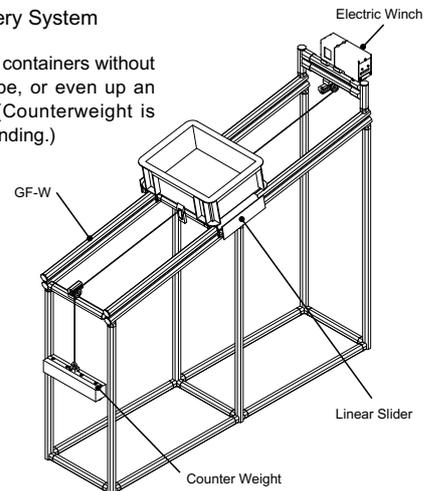

Container Lifter

Table can be raised and lowered. This simple mechanism requires neither springs nor counterweights.

Lateral Delivery System

Laterally transfer containers without a downward slope, or even up an inclined slope. (Counterweight is required for unwinding.)

Operating Pattern

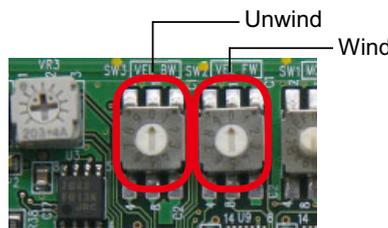

Simply select one of the eight pre-programmed operating patterns from the chart below by using the setting switch in the controller.

SW1	Operating Details
0	Wind when switch 1 is ON Unwind when switch 2 is ON
1	When switch 1 is ON, move until lifting LS turns ON When switch 2 is ON, move until lowering LS turns ON
2	Wind while switch 1 is ON, then return to the lowering LS when OFF
3	Unwind while switch 1 is ON, then return to the lifting LS when OFF
4	When switch 1 is ON, wind until the lifting LS turns ON, then return to the lowering LS
5	When switch 1 is ON, unwind until the lowering LS turns ON, then return to the lifting LS
6	Wind while switch 1 is ON and return to the lowering LS when OFF When returning, wind again if switch 1 is turned ON
7	Unwind while switch 1 is ON and return to the lifting LS when OFF When returning, unwind again if switch 1 is turned ON

* Use of options 8~F is prohibited. Do not select.

Changing the Operating Speed

You can select one of ten operating speeds by using the setting switch in the controller.

Electric Winch

Optional Parts

[A] Photoelectric Sensor for DW

Item No.

XAK-S058

Transmission-type photoelectric sensor used for the lifting and lowering LS.

Detection Distance: 600mm Cable Length: 2m
Sensor Model: PR-F51N3 (Keyence)

[B] DW Photoelectric Sensor (with GFS)

Item No.

XAK-S059

[A] comes with a GF-S frame.

Adjustment Range X: 560mm, Y: 66mm

[C] Limit Switch for DW

Item No.

XAK-S060

Limit switch used for the lowering and lifting LS.

Distance to Activation: Maximum 6mm

Cable Length: 2m

Switch Model: D4MC-2000 (OMRON)

[D] Limit Switch for DW (with GF-S)

Item No.

XAK-S061

[C] comes with a GF-S frame.

Adjustment Range X: 33mm, Z: 43mm

[E] OT Switch for DW

Item No.

XAK-S063

Switch installed outside the lifting and lowering range for use as an emergency stop.

Distance to Activation: Maximum 6mm Cable Length: 2m

Switch Model: D4MC-2000 (OMRON)

[F] OT Switch for DW (with GF-S)

Item No.

XAK-S064

[E] comes with a GF-S frame.

Adjustment Range X: 33mm, Z: 43mm

[G] Sensor Cable for DW (2m)

Item No.

XAK-S062

LS cable for the customer to connect the photoelectric sensors, limit switches, etc.

[H] OT Switch Cable for DW (2m)

Item No.

XAK-S065

Cable for the customer to connect an emergency stop limit switch, etc. Use a limit switch with a normally closed, non-voltage contact for connecting.

[I] Switch (two buttons)

Item No.

XAK-S046

Operation Switch

Cable Length: 3m

[J] Switch for DW (two buttons & EMG)

Item No.

XAK-S057

Operation Switch + Emergency Stop

Cable Length: 3m

[K] Switch Cable (3m)

Item No.

XAR-P02

Use when lifting and lowering switches are prepared by the customer.

(Use when installing two switches in the same location.)

[L] Switch Cable 2 (3m)

Item No.

XAR-P04

Use when lifting and lowering switches are prepared by the customer.

(Use when installing two switches in the same location.)

[M] Foot Switch (one switch)

Item No.

XAK-S047

Foot switch for operation. Cable Length: 1m

(Can be used for operating patterns 2 through 7.)

[N] Motor Extension Cable (2m)

Item No.

XAR-024

Use if you want to install the device farther away from the controller.

Maximum length of 10m. (four pieces)

[O] 24V Output Cable

Item No.

XAR-P07

Use to connect to a power supply when using a photoelectric sensor, etc. Length: 0.3m

[P] Input Cable to Disable Timer

Item No.

XAR-P08

Use to disable the timer setting in the controller. Length 0.3m

[Q] Output Cable (6P)

Item No.

XAR-019

Cable to connect the controller output to a PLC, etc. Length: 0.15m

[R] AC Adapter for DW

Item No.

XAP-B229

Dedicated AC adapter for DW1000
DC24V 1.6A Cable Length: 3m

[S] DC Cable With Plug (0.5m)

Item No.

IFP-A034

Use to supply power to a controller from a DC24V power supply prepared by the customer.

[T] Fishing Gut Wire (2m)

Item No.

GFW-461

Replacement Fishing Gut Wire. ϕ 2

*1 Speed may fluctuate due to elongation of the wire, etc.

Important Notes

- The fishing wire that is wound in this product is 1000mm long. If the length exceeds 1000mm, the wire will overlap during winding, significantly reducing the fishing wire's lifespan.
- The distance from the winding section of this device to the lifted end should be 200mm or more. Be sure to keep the center of the winding section and the center of the load at a perpendicular angle. If the center position is out of alignment, the winding of the fishing wire will be unbalanced, significantly reducing the wire's lifespan.
- Gather and secure the cables for the controller, LS, etc. along the frames of the base to ensure that they will not get caught in the up/down motion during operation.

Important Notes

- This device cannot be used for positioning applications utilizing the movements of the rod. The rod's operating end (stop position) is not consistent and may vary even when the motor brush is worn out due to extended use.
- A DC brush motor is used. As a result, it may generate external noise which increases over time as the brush wears out. This can affect equipment that handles low level signals such as measuring instruments or radio receivers, and may cause problems if used in the same device.

- ① Set the height so that the Starter Roller is 0~0.5mm higher than the corocon rollers.
- ② Do not apply excessive external force or strong impacts to the main unit.
- ③ Do not pull or twist the motor leads, connectors, or sensor cables.
- ④ Do not store the main unit near a strong magnetic field or strong magnetic object for a long period of time.

SiO

What is SiO Controller?

Function

You can send an ON/OFF command to an output device by observing the ON/OFF status of an input device.

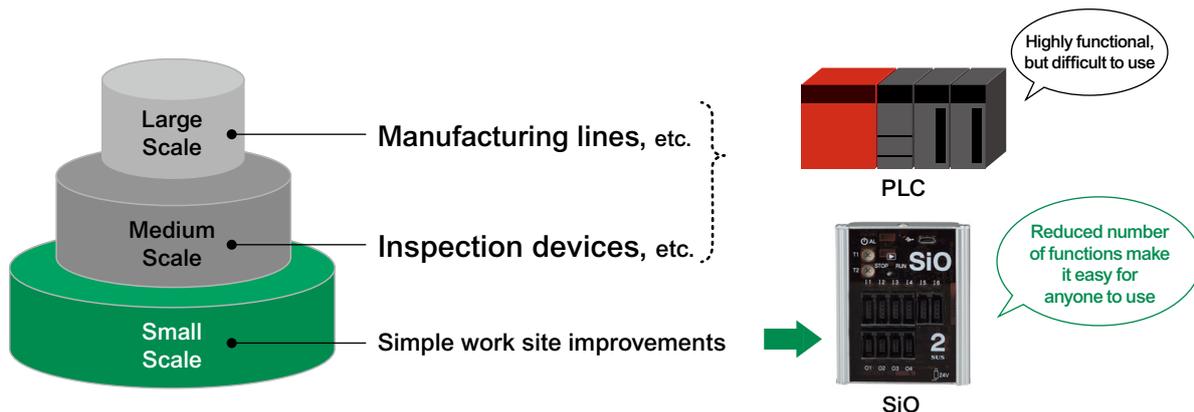

Set output conditions on the SiO Controller. When the conditions are met, a command is issued to the output device.

Applications

Ideal for simple work site improvements or automating karakuri in places where a PLC would be “over-engineering.”

When setting up an automated system in a factory, it used to be common practice to use a PLC (programmable logic controller). By using the SiO Controller, you can make simple improvements to the work site in places that could benefit from automation, but don't call for a full PLC.

How to Quickly Set Up SiO

1

Select Devices

Select the required devices. As options, we offer a large number of input/output devices and extension cables that can be used right out of the box.

Options are on P.103~

Selection From Our Diverse Lineup

Input Devices

Choose the one that best suits your operation, items, etc.

Photoelectric Sensor Transmission Type (SUC-196)

Proximity Sensor (SUC-194)

Output Devices

In addition to buzzers, you can also use electric components such as Power Units.

Buzzer (SUC-206)

Controller

Choose the number of input and output points and other necessary parts according to your situation.

2

Connect

Simply plug the selected input/output device into the SiO Controller. Plug in the AC adapter to turn on the power.

3

Program SiO

Set the conditions for controlling the input/output devices with "SiO Programmer," the free, dedicated software for Windows.

By choosing from drop-down menus of English-language options, you can easily set the required fields.

*The products on this page include an e-CON connector.
 Connection to SiO-C is also possible by using the e-CON Connector Terminal Block (SUC-162).

Switch Box (one button)

Item No. **SUC-203**

Box with a pushbutton switch.
 Cable Length: 1m

Photoelectric Sensor (transmission type)

Item No. **SUC-196**

The sensor detects an object when it blocks the optical axis between the receiver and the transmitter. The transmitter and receiver need to be installed diagonally to align their optical axes.
 [Detectable Objects] Non-transparent objects
 Cable Length: 2m
 [Detection Distance 0.6m]

Photoelectric Sensor (transmission type)

Item No. **SUC-277**

The sensor detects an object when it blocks the optical axis between the receiver and the transmitter. The transmitter and receiver need to be installed diagonally to align their optical axes.
 [Detectable Objects] Non-transparent objects
 Cable Length: 2m
 [Detection Distance 20m]

Photoelectric Sensor (reflective type)

Item No. **SUC-195**

The sensor detects a target when light reflects off the object. Almost all objects, including metals, can be detected.
 [Detectable Objects] Objects with a uniform color or shape
 Cable Length: 2m
 [Detection Distance 0.1m]

Proximity Sensor

Item No. **SUC-194**

The sensor is activated when an object approaches. Can detect objects regardless of cleanliness or shape.
 [Detectable Objects] Metal, iron, aluminum, etc.
 Cable Length: 2m

Flexible Rod Switch (with cover)

Item No. **SUC-200**

A switch (with cover) to mechanically detect an object.
 Cable Length: 2m

Flexible Rod Switch

Item No. **SUC-201**

A switch to mechanically detect an object.
 Cable Length: 2m

Limit Switch

Item No. **SUC-193**

A switch to mechanically detect an object.
 Cable Length: 2m

Input Cable for Power Unit

Item No. **SUC-192**

Used to detect the forward and rear ends.
 Cable Length: 2m

With Power Unit (B) Electric Stopper Input Cable for Electric Winch

Item No. **SUC-198**

Used to detect the forward and rear ends.
 Cable Length: 2m

Emergency Stop Switch Box

Item No. **SUC-220**

Switch box for emergency stop. When pressed at the B point, the input turns OFF.

SiO Optional Items

I/O Cable

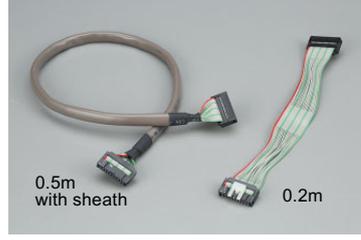

(One-sided connector 2m)

Item No.	P47-115
----------	---------

Cable for wiring SiO and input/output devices.

I/O Cable (Double-sided connector)

Item No.	SUC-118	SUC-117
Length	0.5m	0.2m

Cable to connect to the connector terminal block and the SiO Controller.

e-CON Connector Terminal Block

Item No.	SUC-162
----------	---------

Space-saving design with SiO dedicated e-CON terminal block. DIN rail mounting.

* I/O Cable (SUC-118 or SUC-117) and e-CON 24V Splitter Cable (SUC-207) are required to connect to SiO-C.

Connector Terminal Block (spring type)

Item No.	SUC-147
----------	---------

Space-saving design with a special spring-type terminal block for the SiO. DIN rail mounting.

(External Dimensions: W43×D78.8×H46)

* I/O Cable (SUC-118 or SUC-117) and 24V Splitter Cable (SUC-120) are required to connect to SiO-C.

Connector Terminal Block (screw type)

Item No.	SUC-119
----------	---------

Threaded connector terminal block. DIN rail mounting.

* I/O cable (SUC-118 or SUC-117) and 24V splitter cable (SUC-120) are required to connect to SiO-C.
Terminal Screw: M0

AC Adapter

Item No.	SUC-261
----------	---------

AC adapter for supplying DC24V to the SiO.

24V Splitter Cable

Item No.	SUC-120
----------	---------

Cable to supply power (DC24V) to sensors, etc. from the AC adapter.

e-CON 24V Splitter Cable

Item No.	SUC-207
----------	---------

Used to supply power from the SiO-C to the e-CON Connector Terminal Block (SUC-162).

USB Cable

Item No.	SUC-121
----------	---------

This cable connects the SiO to a PC. It is needed to read and write programs in the software.

Cable with DC Plug

Item No.	IFP-A034
----------	----------

Supplies power to the SiO from an external DC24V power supply.

Large Storage Box

Item No.	SUC-145
----------	---------

Box with DIN rail to store the SiO. (Inner Dimensions: W232×D132×H101)

Small Storage Box

Item No.	SUC-144
----------	---------

Box with a DIN rail to store the SiO. (Inside Dimensions: W126×D126×H101)

Aluminum Corocon 3520P50

Material/Technical Data
Material : Frame : Extruded Aluminum
 Wheel : High Density Polyethylene
 Pin : Stainless
Weight : 1.00kg/m
 ● Please order cut part in increments of 50 mm

- Improves performance and reduces noise.
- Resin pins limit the escape of metallic powder.
- Wheel pitch of 50 mm.

Tightening Torque for Connector 15 N · m

Condition : Apply load where the arrow shows in the drawing.

- Slide Load** : Allowable load on shift direction.
- Pull-out Load** : Allowable load on pulling direction of connector.
- Compression Load** : Allowable load on direction of compression.
- Moment Load** : Allowable moment for distance of length (L) from where connector is connected.
M (Moment) = F (Force) × L (Length)

Frame Strength Data (GF-N)

Condition: 1. Secure both ends of the frame and apply a concentrated load in the direction of the arrow.
2. Frame length is an inside dimension including connectors.

Calculating Formula

◆ Recommended Load

$$\delta = \frac{FL^3}{48EI}$$

Recommended Load: Deflection in the middle of frame is 5/1000 of frame length.

Critical Load: When the frame starts to deform.

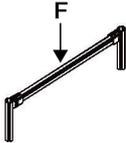

※If exceeding the recommended load, please keep it lower than 80% of critical load.

※If the slide load of a connector is smaller than the recommended load and critical load, fill in the slide load of the connector. (in blue)

◆ Critical Load

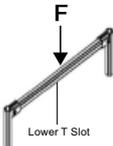

$$\delta = \frac{FL}{4Z}$$

Green Procurement

1. Purpose

The purpose of this document is to clearly state prohibited substances designated by laws and ordinances as well as managed substances which are limited in their volume of use, and procure products and services with a lower environmental burden for materials that compose SUS Corporation products and for chemical substances included in these products.

2. Scope of Application

2.1 Scope of Application to Products

- 1) Products designed, manufactured, and sold by SUS Corporation.
- 2) Products commissioned for design and manufacturing to a third party and sold with the SUS Corporation trademark by SUS Corporation.
- 3) Products purchased from another corporation, incorporated into another product and sold as a finished product by SUS Corporation.
- 4) Products which have been commissioned for design and manufacturing by a third party to SUS Corporation.
(Excluding parts and materials designated by the third party.)

2.2 Scope of Application to Parts and Materials

This includes parts, materials, and other items used in products included in "2.1 Scope of Application of Products" above. These parts and materials are as follows.

- 1) Semi-finished goods (assembly parts including functional units, modules, circuit board assemblies, etc.)
- 2) Parts (electric parts, component parts, screws, semiconductor devices, printed circuit boards, etc.)
- 3) Accessories for using devices (electric cables, harnesses, AC adapters, etc.)
- 4) Component materials of secondary materials (adhesive tape, solder material, bonding agent, etc.) used in the product
- 5) Documents such as instruction manuals
- 6) Packing materials, packing parts, etc. (bags, cushioning, sheets, wrapping, cardboard, tape, cable ties, labels, printer ink, paint, etc.)

3. For regulated substances which are subject to SUS Corporation green procurement standards, see the list on the SUS Corporation homepage.
<http://www.sus.co.jp/procurement/>

RoHS

RoHS, short for "2002/95/EC (Directive on the restriction of the use of certain hazardous substances in electrical equipment)", is a directive regarding the use of specified hazardous substances in electrical and electronic equipment promulgated by the European Union Council & Parliament directive on January 27, 2003.

In principle RoHS prohibits the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) (maximum permissible concentrations are 0.01% by weight for cadmium, and 0.1% by weight for the other 5 substances), and it was enforced in July 2006.

Several items concerning target products and application exclusions were revised by the June 8, 2011 European Union Council & Parliament directive "2011/65/EU (Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment <recast>).

Description on RoHS Compliance Products

According to the publication of revised RoHS directives, our products are, from July 22, 2019, targeted of 10 substances compared to the 6 substances before revision.

RoHS10 Compliance Products · · · Products confirmed that revised RoHS directives are followed. Can continuously be used as RoHS compliance products after July 22, 2019.

RoHS6 Compliance Products · · · Conform to former RoHS directives (restricted 6 substances) only.
Or products that are investigated for conformity to revised RoHS directives.

REACH SVHC

REACH is a regulation on the registration, evaluation, authorization, and restriction of chemicals in the European Union (EU) which was voted on by the European Council in December 2006 and after being published in the official gazette, came into force in June 2007. The name of the regulation is an acronym for "Registration, Evaluation, Authorization, and Restriction of Chemicals". REACH mandates that manufacturers and importers register and evaluate their products when manufacturing or importing chemicals in the EU, and requires relevant authorities to make restrictions, such as giving permission for substances of very high concern (SVHC) or prohibiting substances of even greater risk. Entities that do not fulfill the obligations required by REACH cannot manufacture or launch chemicals within the EU. SVHCs are periodically added as "candidates for authorization", and ultimately it is expected that approximately 1,000 chemical substances will be covered by the year 2020.
